

VISALUS VITAMINS & MINERALS CAN HEAL YOUR BODY

Recently I as a Canadian was introduced to an American multi-level marketing company, VISALUS with what appears to be a vitamin & mineral supplement and anti-oxidant & essential fatty acid supplement that really works for an affordable price.

I am a Canadian veterinarian with three science degrees and I major in food animal medicine, so I have some ability to critique nutritional ideas & products out there.

This health supplement product line provides basically full spectrum vitamins, mineral, essential fatty acid (EFAs), anti-oxidants & co-factors (enzymes, etc.) and healing herbs, all from natural or botanical sources (plants & fruits).

The mineral content in the Visalus product line represents not just the macro-minerals such as calcium, magnesium, phosphorus among others, it has micro-minerals that can bring healing to your body's tired-out glands like the THYROID and these micro-minerals include iodine, selenium, zinc, manganese, copper, chromium, vanadium, molybdenum, boron, etc.

The trace minerals chromium & vanadium are the key elements along with supportive co-factors that are lacking in the persons with Type II diabetes and in N.A. now with our chronic toxic & deficient factory farm food supply, even children are coming down with Type II diabetes.

A senior American veterinarian convinced me months ago (since I too am a veterinarian with my major in food animal medicine) that he as a naturopath had developed a colloidal mineral supplement which had for decades been curing folks of their Type II diabetes and he had identified to his audience, that this disorder developed based on the deficiency of micro-minerals chromium & vanadium in the people's diets.

This resolution of the Type II diabetes, this veterinarian-cum-naturopath claimed only took 30 days from the start of mineral supplementation.

The American company is BODY BY VI or Visalus and it's publically traded with credible science technology and established factories behind it.

It is a weight loss and/or exercise-conditioning supplement (building muscle) and it is so complex and balanced in its mineral & vitamin, co-factor & anti-oxidant profile, that the Saskatchewan folks locally who have been on the line of the products, available, after a month or so are seeing resolution of their TYPE II DIABETES and may be able to go off their insulin pills.

A person from Alberta who has Type I diabetes has been able in the spring of 2011 to use much less insulin.

One shouldn't just ignore the balanced formula of say the Visalus mineral, vitamin & co-factor supplementation and just go buy some chromium & vanadium pills (if you can find them alone or together) since there is a whole assembly of co-factors necessary for these micro-minerals to work properly to heal the body and they have to be present in the right amounts and/or ratios.

A young man from Alberta working in Saskatchewan with Crohn's and others with colitis are gaining amazing new energy has healing obviously sets in.

A local Saskatchewan lady, who had been on the products (there is whole line of supplements plus the milk shake supplement/meal replacements) for not too long and has MULTIPLE SCLEROSIS reported for the first time she had ENERGY to get her housework done.

There testimonies from Alberta and in Saskatchewan, Canada include folks seeing their high blood pressure resolve and some are gaining relief from migraine headaches to the point that they DO NOT occur anymore.

The same thing was reported by another Saskatchewan lady who suffers from FIBROMALAGIA where her sleep was much better and hence her daytime energy levels are approaching normal.

The Saskatchewan reports include folks who have addictions problems such as smoking cigarettes, allegedly have claimed that once their body is on the main Visalus product line, soon find their CRAVINGS for tobacco is lessened.

Also smoking and/or use of pharmaceutical drugs tend to drain the body of vitamins, so it's important to replace this loss; this is why pregnant women that smoke during pregnancy may end up being more vulnerable to birthing out babies with spina bifida which is related to a Vitamin B group member known as folic acid.

Abnormal cravings in the animal world, that we as veterinarians have observed such as cows chewing on bones is known as PICA and represents in this case a deficiency in phosphorus.

As my blogs of over two years now have exposed, the Illuminati who are now moving rapidly to establishing a one world gov't have helped implement this plan-of-the-ages by destroying the global sheoples' abilities to fight back and maintain their individual human rights & their nation's sovereignty.

This means that the Illuminati have used their globally-based "medical" orgs to considerably weaken the sheople, so that the often toxic-side-effects-based pharmaceuticals are the ones primarily used to treat the clinical signs of plain mineral and vitamin deficiencies which doesn't work.

This kind of non-holistic approach to health has created epidemics at least in N.A. of both physical and MENTAL HEALTH brain function disorders.

In Saskatchewan, the gov't appears to have helped create a mental illness epidemic even among the children,---so this appears to be a dietary-based coup with a drug cover-up.

This is why the recent testimonies of Saskatchewan folks who are on anti-psychotics for BIPOLAR, etc. are finding that once they are on this Visalus vitamin & mineral and anti-oxidants & EFA formula, that they are gaining back mental clarity and normal thinking patterns (think Vitamin B complex and the essential fatty acids (EFAs) and Vitamin C).

Many in Saskatchewan are on some kind of "nerve" or "behavioural modification" pills (e.g. hyperactive children on Ritalin).

These folks are now much improved in terms of their mental health with clinical signs of normalcy breaking through.

This supports the idea that a Saskatchewan psychiatrist Dr. Abram Hoffer had in the 1960s when he did research at the University of Saskatchewan, Saskatoon campus on treating schizophrenics with large doses of Vitamin Bs and Vitamin C which he terms orthomolecular medicine.

Many young males into fitness (boxing, etc.) are taking Visalus products now instead of PROTEIN SHAKES because Visalus provides better muscle building nutrients and because of the soluble fiber levels in the Visalus shake, the latter does not cause constipation which often happens with many of the almost-all-pure-protein shakes out there.

Some testimonials are coming from our Saskatchewan Valley or Saskatoon area and the product has just been in Saskatchewan since early 2011---so there is room to make some money for those who sign up now but even better there are many health benefits since most of N.A. is deficient in dietary nutrients (minerals, vitamins, essential fatty acids (EFAs), anti-oxidants, many co-factors like bioflavonoids, etc.) important for maintaining excellent health and/or disease & inflammatory disorder prevention.

The local Visalus (Body by Vi) distributor told me recently, that folks who have LUPUS have reported how helped they have been by these products.

And this shake is lactose free and is only sweetened using SUCRALOSE so diabetes can use it.

Sucralose is an artificial sugar but is not toxic like others artificial sweeteners, in that it passes through the body basically un-digested; each shake contains less than one gram.

<http://en.wikipedia.org/wiki/Sucralose>

The protein in the health supplement shake is made from non-GMO soybean protein with the phyto-estrogens (or isoflavones) removed to prevent harmful effects on males & babies who are in utero or breast-feeding and also the protein in the shake is sourced from whey (cow's milk) protein, with all three being highly absorbable.

To actually feel the effect of the once-a-day, Visalus meal supplement or replacement, you need to take it for only three days.

I think this is based on the fact that many folks in N.A. today because they are not consuming a proper mineral profile, lack digestive abilities and over all we all digest better a LIQUID-based vitamin & mineral supplement.

This is the claim of the U.S. senior veterinarian-cum-naturopath, in terms of providing his mineral supplement in liquid colloidal form to the people.

Also overall, minerals (think rocks) are not readily absorbed on-their-own at the gut level (they also need co-factors present such as other vitamins), so Visalus (this has been done in the dairy nutrition world for years) has chelated the minerals (say a biochemica aid such as an amino acid, with a charge and amino acids are the basic building blocks of proteins) so that their bio-availability at the gut level is greatly increased from a few per cent to up to 40%.

I think, this is why one older man from Saskatchewan with a colostomy, based on unrecoverable ulcerative colitis (so he had his colon surgically removed), could GAIN weight on the Visalus vitamin & mineral shake after one month on the product.

Many have lost a lot of weight and/or have gained new energy.

Visalus also have other products that are natural which wake up thyroid function and get the metabolism working again, so folks don't gain weight by just eating a few calories.

These products as weight loss aids apparently work really well so that folks who are obese and want to go on a 90 day challenge to lose weight, just have to use the shake and vitamin/mineral and herbal supplements without a complex count-your-calories daily plan.

The obese also have the help of METAB AWAKE and the Vi-Trim where both of these products help burn fat and awake the metabolism, which is related to improved thyroid function.

The other thing that people are reporting is that they are SLEEPING better, with their rest being deeper and more healing; this could be a godsend to the many insomniacs in our N.A. culture currently, who have a burnt-out, undernourished nervous system.

If you want to try the Visalus products, they come in a ONE MONTH supply presentation with a 30 day money back guarantee.

To order some of these Visalus products today, go to my website:

9, 2011 and based on the New World Order/Illuminati/high-degreed freemasonry global elite's M.O. to gain world domination soon, they stage many of their events on numerology days and astrology as the Luciferians they are.

This week is especially bad since Wednesday is May 11/11 (they love the number "11") and Friday is May 13/11 where they really love the superstitious combination of Friday, the 13th.

Why, I am so moved to get you signed up on a properly balanced & adequate mineral & vitamin and anti-oxidant & essential fatty acid supplement like VISALUS offers and that likely the aging global cabal, the Illuminati use something like it, themselves to keep healthy & active,---is because we will not be able to bear this last big assault by the globalists in terms of our health issues, based on all the toxic geo-engineering (chem trail spraying and HAARP-induced electro-magnetic field changing) going on over N.A. currently.

HAARP induced the big 9.1 (RS), March 11, 2011 Japan quake and compromised the 6-reactor Fukushima nuclear power plant and North American (both the west coasts of Canada & the U.S.) have been bathed ever since by the prevailing winds coming from Japan with radio-active fall-out.

They don't plan to cap this beyond-Chernobyl, all-6-reactor nuclearmelt-down at Fukushima for months to come and hence much radio-active steam from their dousing the reactors with huge quantities of sea water to keep them from catching on fire,--contains a lot of radio-activeiodine-131 and this is getting to us in N.A.

In took about a week, post-3-11-11, Japan quake and the compromising of the Fukushema nuclear power plant for the radio-active pollution to circle the earth at least in trace amounts, in far away areas.

Our current factory-farm diet in N.A. has about a third less of the dailyiodine we require to keep our thyroids healthy and actively producing those important thyroid hormones that control so many physiological issues, like adequate energy levels and metabolism activity.

Our N.A. gov't are controlled by the globalists so they don't care to protect the people from the cumulative effects of this constant dripping of radio-active pollution coming from Japan to N.A. since this too is a part of the slow kill plan to depopulate the earth,---the passion of this global cabal.

This is why it was important that folks who lived in the regions of Alaska to British Columbia and down to California should have been on iodine-rich kelp drops and in severe risk areas, the people should have protected their thyroids by taking potassium iodide pills.

Uploading the thyroid with good iodide prevents the thyroid from picking up radio-active iodine which will irradiate this important gland and lead to its dysfunction and possibly will cause CANCER of the thyroid.

The Visalus shakes and the mineral & vitamin supplement (as a part of the Vi-Pak, four supplement preparation) both contain the trace mineral IODINE.

Why our diets in N.A., especially in the land-locked areas (away from the sea & iodine-rich foods) like where I live on the Western Canadian prairies, are so deficient in iodine is that the federal gov'ts have only legislated that our table salt to be iodized and apparently all the processed foods are seasoned with non-iodized salt!

Post-WWII, the globalists' military-industrial complex were still at it---with their new toy, NUCLEAR POWER when they were experimenting with exploding nuclear bombs in an area like Nevada and the winds picked up the radio-activity and carried it into Western Canada.

Some thought they caused a mini-epidemic of thyroid cancers and/or damaged thyroid function in the people in Canada.

I was born in 1952 in Saskatchewan, Canada and my mother could have received small doses of radio-active iodine into her thyroid from these U.S.-based nuclear tests and many of my siblings over time have shown low thyroid function as they have aged.

I can say that as a trained veterinarian, that in Saskatchewan I have observed for years that many folks around me have strong clinical signs of being hypothyroid but the Illuminati's MEDICAL MAFIA primarily tell these folks that their thyroid tests are normal and then prescribe expensive and oftentimes-with-serious-side-effects DRUGS to combat symptoms of low thyroid function like elevated BLOOD CHOLESTEROL and/or blood triglycerides.

Note that even toddlers can be given, say one quarter of a Visalus shake a day, to help protect their thyroids from being polluted by the Japanese radio-activity washing over us continually right now in N.A.

By the age of four years old, the child could have a half a Visalus shake a day along with all the other necessary nutrients for growth and function from a proper diet (which is hard to find in terms of our factory-farm-based food stuffs currently).

Minerals apparently are better absorbed at the human gut level when other co-factors like vitamins are present which the Visalus shake with its multi-mineral & multi-vitamin profile provides.
